

Ohio Energy Facts

The Public Utilities Commission of Ohio's [Ohio Long Term Forecast of Energy Requirements 2008-2027](#) presents year-by-year forecasts of the prevailing energy, economic and demographic trends in the U.S., Ohio and utility service areas in Ohio for the next 20 years. In addition to this report, [Ohio Energy Data Reports](#) are available. These reports provide reasonable access to current Ohio energy data, statistics and information. They offer the most current information about the production, consumption and price of energy in Ohio.

The U.S. Department of Energy's [Ohio Energy Summary Fact Sheet](#) provides a summary of energy in Ohio. Here you will find an overview of energy consumption, listing of energy efficiency goals under the Energy Policy Act of 2005 (EPAct), a summary of the status of renewable energy and energy efficiency policies and a list of political leaders and state agency administrators who shape energy policy for Ohio.

The U.S. Energy Information Administration provides an [Ohio Energy Profile](#) that includes:

- **Energy Maps** which display Ohio's energy infrastructure and renewable energy potential.
- **Quick Facts** that provide the most important Ohio energy information.
- **Written Overviews** that explain how fossil fuels, renewables and alternative energy sources affect Ohio's energy markets.
- **Data Tables** that provide the most current Ohio-level statistics from EIA surveys.
- **State Rankings Pages** displaying selected data series ordered by data value.
- **Associated Links** which take users to specific web pages on which EIA's detailed data and time series can be found.
- **State Data Directory Pages** that provide comprehensive lists by subject of EIA's Ohio-level information plus direct links to the information.
